Innovation.

Regeneration.

Aesthetics.

Dear clinical user,

botiss biomaterials offers you a unique systematic BTR approach, the complete biologic regenerative solutions portfolio for implantology, oral surgery, CMF and periodontology out of one hand.

We all know - no single bone graft or soft tissue material is able to suit all medical indications and biologic situations. To achieve optimal results, you have access to the botiss BTR System. Covering all your GBR/GTR requirements for different materials (bovine, porcine, human, synthetic). The products are produced with the highest quality standards and all products are strictly biologic.
